ISMET HERDEM'S TURKISH TALK

GISB 1060 • Tuesday 3/19 • 7:00 PM

Siber Güvenlik, Siber Savaş ve Toplum Mühendisliği

Cyber Security, Cyber Warfare, and Social Engineering

As many of us know, technology has become the most important tool in this century. People use the internet all around the world to communicate. Additionally, Cyberspace has become a significant field in our daily lives as well. Most importantly, the Internet has become an invisible part of social and economical fields. Many people today want to capture our personal information and even our money. Therefore, we need to protect our computer systems and mobile devices and take specific precautions to prevent cyber attacks. Since cyber crimes are a new kind of crime, governmental institutions and companies should involve in order to defend their vulnerable data and computer systems. It should be noted that the cyber actors and nation states may attempt to steal important information. Unfortunately, cyberspace has become a cyber warfare in the contemporary world of technology.

Full talk in Turkish with simultaneous written English translation

Ismet Herdem holds a M.P.A (Master of Administration) degree from Metropolitan College of New York. He is a graduate student and a graduate assistant at the Department of Central Eurasian Studies in the Hamilton Lugar School of Global and International Studies at Indiana University-Bloomington. He attended Baskent University (Turkey) and majored in Political Science and International Relations. He witnessed the world's political issues through firsthand experience. He learned about different cultures and attained different perspectives of the world. Such experiences help him to see the opportunities in the world in a comprehensive way.
