

Nerd Meets Bird

How birds teach us about our changing world

You don't need to be a die-hard birder to appreciate our feathered friends! From the wrens singing by your window in the morning, to the chicken on your sandwich at lunch, to your friend's pet parakeet, to the Canada geese flying overhead each spring and fall... the presence of birds and their seasonal rhythms are intimately enmeshed with everyday lives. If we watch and listen closely, what can we learn from them?

This event features stories and research from graduate student Katie Talbott, a viewing of the film *A Big Year*, a pop up library, and pizza for attendees.

Monday, Oct. 22

5-8 pm

Sciences Library—Chemistry 002

Katie Talbott

is a PhD student in the Ecology, Evolution, and Behavior program. Her interests lie at the interface of local adaptation, animal behavior, and disease ecology. Katie has been sharing her scientific knowledge with the public in a variety of ways, which includes public outreach at the Minnesota Zoo.
