My research advances a political ecology of knowledge production, examining how culture, discourse, and structured environments shape the ways learning is organized, authorized, and experienced. Through ethnographic and institutional analysis, I investigate how interpersonal relationships, ecological concerns, and knowledge formulations structure production in a comparative project sited in alternative food networks and higher education institutions. My work foregrounds the social nature of knowledge and shared worlds. My sustained research trajectory contributes to cultural, environmental, and educational anthropology while advancing interdisciplinary conversations about authority, justice, and institutional transformation.

Teaching Leadership and Innovation

Beyond individual classrooms and toward institutional transformation.

Graduate Certificate. With College Executive Associate Dean Jane McLeod, I drafted the proposal for an IU graduate certificate in college pedagogy. It was approved by the Indiana Commission for Higher Education. I have co-directed the certificate with Professor Thomas Laird since its approval in 2016.

Learning Analytics initiatives. I was awarded $40,000 in external and internal competitive grants to support my research and leadership on Learning Analytics and Grade Surprise, from 2015-2019. I emphasized collaboration, scale and institutional transformation such that the research impacted courses serving over 10,000 IU students in social science, science and humanities departments and launched further research and dissemination.

Ethnography of Education. I have a longstanding research agenda that investigates higher education through ethnographic research methods, including in STEM courses (computer science, math, chemistry) and graduate student experience learning to teach. This research channel has intersected with multi-million-dollar institutional grant, dozens of graduate student publication, an award-winning book, and educational workshops.

Multi-section course leadership. Since 2002, I have taught the large general education course Interpersonal Communication at IU, first as an instructional consultant and eventually as a professor of practice in the Department of Communication and Culture. I continued teaching the course after I moved to the Department of Anthropology. A cohort of 6-12 graduate students teach the 12-24 sections every semester. My cumulative impact at IU has been on over 20,000 undergraduate students in this course alone over my IU career.

Network development leadership. I have applied networked development of expertise with international and national faculties, graduate students, and undergraduate students to transformation higher education institutions into learning-centered environments.
